

# High Speed Internet

Internet service from RingTel Communications is provided over a secure, fast Internet backbone. Our technicians are highly skilled at providing a solid, stable product that will fit any need. Whether that calls for our high speed DSL service or our low speed dial-up service, rest assured that we are providing the best product on the market.

## High Speed DSL

If you're frustrated with how slow the Internet can be, our DSL (Digital Subscriber Line) service is for you! You'll have a dedicated connection to the Internet, which means you'll never have to dial-up again because you're always connected. You can use the Internet and make phone calls over the same phone line, at the same time. Your DSL account includes up to 5 email addresses. But best of all, you'll connect at speeds that are up to 20 times faster than a standard dial-up connection!

Complex graphics pop-up instantly. You can send and receive huge files in seconds. With DSL you'll experience the Internet the way it was meant to be experienced.
