

SecureIT

SecureIT Live & Plus

Simplify your life and protect your computer investment with SecureIT. This service automatically protects your computer from worms, viruses, spyware and other unwanted activity. In addition, it also provides patch management, performs disk maintenance & optimization and offers pop-up blocking service with Internet Explorer.

With SecureIT Live & Plus, you no longer need to worry about purchasing software or ensuring it is updated. It is a fully managed service 24 hours a day, 7 days per week.
